

Minesweeper

You most likely know the game Minesweeper, even better if you played it before. For those who are new to it, here's a picture -

Check [this link](#) to know how to play

Project Requirement:

- Implement the complete game using appropriate algorithms. (You can make your own algorithm, but must be efficient and fast)

- Must have a proper scoring scheme defined by you (can also follow the default one).
- Allowed languages
 - C++, Java
 - Python, Javascript, PHP
 - Other (inform first)
- Project report:
 - Mention in detail about any extra features you added, if any.
 - Must include detail explanation of your algorithms.
 - Must include short description of all major functions/classes.
